

***The Quality Goes In Before the Name Goes On...***

## ***\*B TEMPO PASSA EVANDER***

***DNA verified, Young Sire Program Qualified!***

***Tempo Passa***- It's just our new name on a proven pedigree. Evander is a cross of our two most proven and consistent dam lines, with depth of quality that is not a mere accident or flash in the pan. All the does on his 4 generation performance pedigree are Excellent, 5 of the 6 are FS92 or 93! These are does that can show and milk with the best of them, and reproduce themselves with daughters and sisters that do the same.

Evander's dam, Elenya is not only SGCH, FS93, and 3600 lbs milk, she's a 4<sup>th</sup> generation SGCH, FS91+, 3500+ lb doe. She follows three generations of Top Ten does that placed 1<sup>st</sup> or 2<sup>nd</sup> at Nationals. Elenya's dam, SGCH Elende FS92, has three maternal sisters with FS90-93, and two SGCH sisters. Elende herself has three GCH daughters, all FS91-93, all with different sires. And we can't forget her newest daughter, our hot yearling Eigeria, FS89 EEEE, with two reserves already.

Evander's sire, Kentucky Win, brings in our "Win" line. He is a son of our '08 National Champion, SGCH WinSeeker, FS93 EEEE. Like Elende, WinSeeker has proven herself as a tremendous brood doe as well. She is the dam of SGCH WinCatcher, '13 National Champion, FS93 EEEE, WinClimber FS93 EEEE, and SGCH WinRiver FS92 EEEE, all with different sires, and all maternal sisters to Kentucky. Kentucky himself has 3 FS90-91 daughters, and a new first freshener at FS89, all with E mammaries. He has 3 GCH daughters, two just finished their GCH with BIS wins this year!

How do you make Saanen history? Take the above animals and add in proven sires like SG ++\*B Cherrypines Stand Out and SG++\*B Briarwind Pharaoh Talut, with over 35 champion daughters between them, including National Champions and Top Ten does. Then dust with \*B Windsor Manor Winning Ticket, sire of the '14 National Champion, liberally sprinkle with many more closely related SGCH and Top Ten does, and you have the recipe for an outstanding herdsire that could take you anywhere you want to go.

***WHY SETTLE FOR EITHER MILK OR SHOW, WHEN YOU CAN HAVE BOTH???***

Elenya has been our star this year, looking her best ever. Though she didn't get to Nationals, she has done well at home, earning a FS93 EEEE. Elenya's dam, Elende is perhaps my all time favorite Saanen. Elende has been a star in the showing and the milkroom. Now she is the strongest brood doe we have ever had. The 'E' line is as consistent as you can get!

## ***Evander's sire-***

### **+\*B DES RUHIGESTELLE KENTUCKY WIN**

**3-04 FS91 EEEE**

**Daughter average 3046 106 91 88**

We don't usually take pictures of bucks, but couldn't resist one of Kentucky this year. Since we don't show bucks, this is a completely unposed picture. As an aged buck, he is so correct, and so gentle that he is a joy to watch and own. Sure, it is the females in the pedigree that do the work and make the records, and Kentucky has more than his share of outstanding parents, sisters, and daughters. Still, sometimes it's nice to have a guy that can do all that, and be good looking too. Like his sire, Evander is a handsome fellow, with a mellow temperament to match.

It's pretty amazing that WinSeeker can have all those incredible records, and yet her biggest strength is as a brood doe! Like Elende, Seeker's quality is no accident, and her strength and depth of pedigree shows in her prepotency as a brood doe. Seeker has not one, but two FS93 daughters, one is a National Champion, and both have records over 3,700 lbs milk. Add in her other progeny here, and you have two daughters which were milking class winners at a National Show, with a first place Produce, first place Dam & Daughter, a final score average of 91.8 on five of her offspring, including Kentucky, and a lactation average of 3404 on four daughters!

# It's All About Consistency...

If the genetics don't reproduce, they aren't reliable. It's not about one National Champion, or one famous sire, but about does with sisters and daughters that can keep doing it, generation after generation. Consistent, strong, powerful performance is what keeps the progress going. It is what keeps us moving forward. And it is what you can count on from a kid from here.

Elentara isn't our first SGCH doe, her genetics reach back much farther. Nor is she our first major brood doe. But, she is currently our Saanen matriarch, and in the pedigree of nearly all of our 'E' line does. Sired by Talut, she is also a paternal sister to WinSeeker, so she is related to all the 'Win' line does as well. Her dam, Elf, was a masectomized brood doe with 3 FS90-91 daughters and two Top Ten daughters, including Elowah 7\*M FS90, 3-00 305 5450 216 4.0% 159 2.9%. Elf's dam, Eden was the twin to Equus, and milked 2-10 305 5259 165 3.1%146 2.8%. Eden's dam, Eta, was the '91 Reserve National Champion, and she milked 4-11 305 4640 158 3.4%. And Eta's dam was ConJurEo, FS93, 1980 National Champion, and the brood doe that is behind all of our current Saanens. Now 15, Elentara is retired, passing the torch and the genetics on down the line. Evander is linebred to this tremendous old girl, and should continue in the consistency of multiple generations of excellent, high production Saanens with the classic des Ruhigestelle type.
